

The Abridged Cycle of Moveable Keys

To use this important 21st century music tool (as created and copyrighted by miAim.com.au) as a reference point, print out this page twice, then cut the two separate circles and the pin the smaller circle on top of the larger one so that you have it in this formation.

To find any Major Key in the Abridged COMK move the desired key to the first position on the Rotation Wheel: **IΔ7** chord.
Notice how all the roman numerals point to the keys affected and all the notes in the scale.

This is the penultimate* improvisation tool.

* The ultimate improvisation tool is the Complete Cycle Of Movable Keys. You can learn more about this in the "Principle of Improvisation" books only available on our website miaim.com.au
